

# ○ Summary and Effect of the Comprehensive Alliance

1. Underpinned by the world’s largest LNG procurement scale, establishing a fuel procurement portfolio that is outstanding in terms of economy, stability and flexibility; and expanding upstream fuel investment and trading business efficiently
2. Significant reduction of fuel consumption through the replacement of old and energy-insufficient thermal power plants with the latest high-efficiency power generation
3. Realization in stages of further improvements in operational efficiency through the integration and optimization of operation of the entire supply chain, from upstream investment to power generation

Major Asian Countries and Companies Scale of LNG Procurement After 10 Years
